

# INSTANT BOX

INSTANT SUITE

Instantly visualise the availability of your spaces

Non-bookable spaces (bubbles, phone booth, collaborative spaces...) can be used temporarily as workspaces. An LED placed above the door indicates **whether this space is free or occupied**. The motion sensor associated and synchronized with Instant Booking, replicated the information **in real time** to the GroomPad, the interactive portal and the Instant Mobile.

Save time for your employees

Immediate visibility of occupied or available spaces

Optimisation of space management

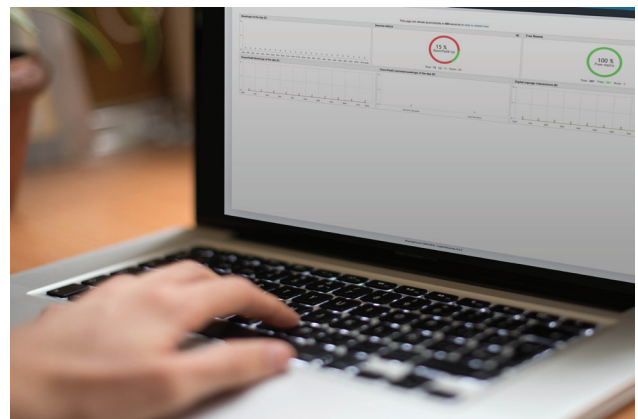

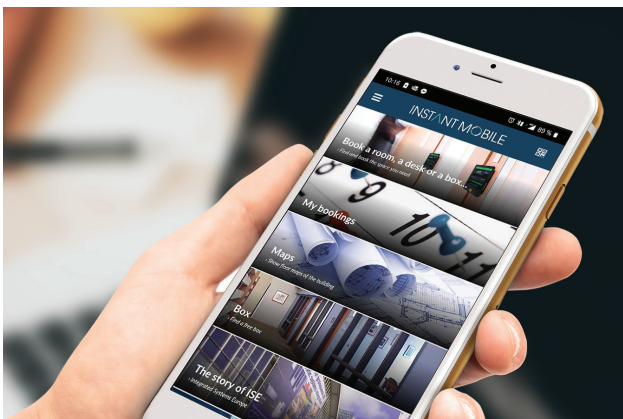

Information updated in real time

## Instant Box allows real estate managers and users to:

---

- **Manage** non bookable rooms easily.
- **Find** non bookable meeting rooms on interactive 3D maps via Instant mobile, RoomPad® and GroomPad.
- **Identify** from afar the status of meeting rooms thanks to the LED placed above the doors.
- **Availability** is indicated by the color. Red is busy, Green is free !

- Fully integrated to Instant Booking, Instant Box offers you the possibility to **visualise the status of non bookable (and bookable) meeting rooms on Instant Mobile**, our smartphone application. Finally, you have a **real time reporting** allowing you to access the statistic of each space, and so to optimise their use.
