

# INSTANT SIGNAGE

INSTANT SUITE

Instant Signage is the complete digital signage solution

Instant Signage allows you **to create playlists and broadcast any content** (RSS feeds, video, image, IPTV, ...) on any screen including RoomPad®, SignPad, GroomPad.

You **manage your playlists and supervise all your devices** from a single lap-top. The broadcasting schedules of your lists are also easily programmable.

Broadcast on any type of digital signage screen

All contents are HTML5 and can be used on any support

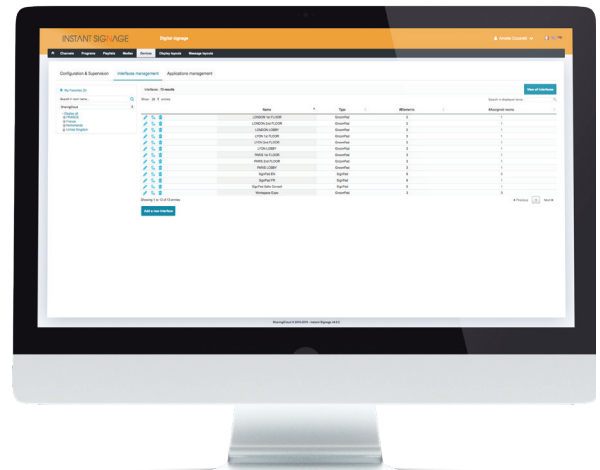

Centralised management of all devices

Create simplified templates for playlists

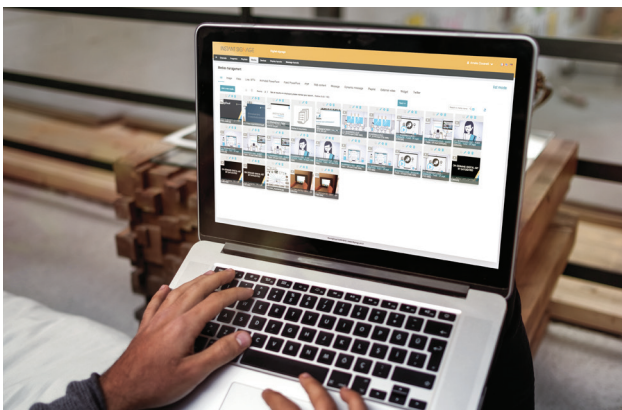

## COMPLETE DIGITAL SIGNAGE SOLUTION

- Instant Signage allows you to create and manage simply any **interactive content** and broadcast them for your employees, customers and visitors.
- You can create playlists in many languages. Playlists can be common for all sites, points of sales or markets or can be unique.
- Instant Signage encodes any media format for you.

## A CENTRALISED MANAGEMENT OF ALL YOUR DEVICES

- The **creation of templates, programs and content** is simple and intuitive. An integrated template editor will give you access to more advanced features.
- The **content is converted** to HTML 5 display and can be reusable on any website, Intranet or Content Management System.
- Contributors can **feed playlists**, and you keep control of publications.
- You can delegate to a country, a region, a city... Instant Signage will even take into account different time zones.

## SUPPORTED FORMATS

**Stream these videos on all types of PC, Mac, smartphones and tablets.**
