

INSTANT MOBILE

INSTANT SUITE

All the features of Instant Booking available on your smartphone

Instant Mobile allows you to **book a room or a desk** and to manage the **integrality of your reservations** all from your smartphone. Instant Mobile makes the reporting of your guests an easy task as well as ordering a cup of coffee.

Thanks to 3D interactive maps and the “way-finding”, **Instant Mobile guides you** towards the room you booked or the meeting you are to attend. You will also be able to **report any problem** such as a broken light bulb or the failure of a system directly from your smartphone.

Plan quickly your meetings

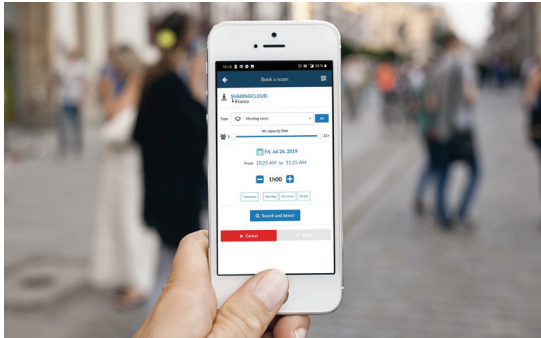

Report a system failure

Manage your reservations in a efficient manner

Easily find available rooms

QUICK BOOKING INTERFACE

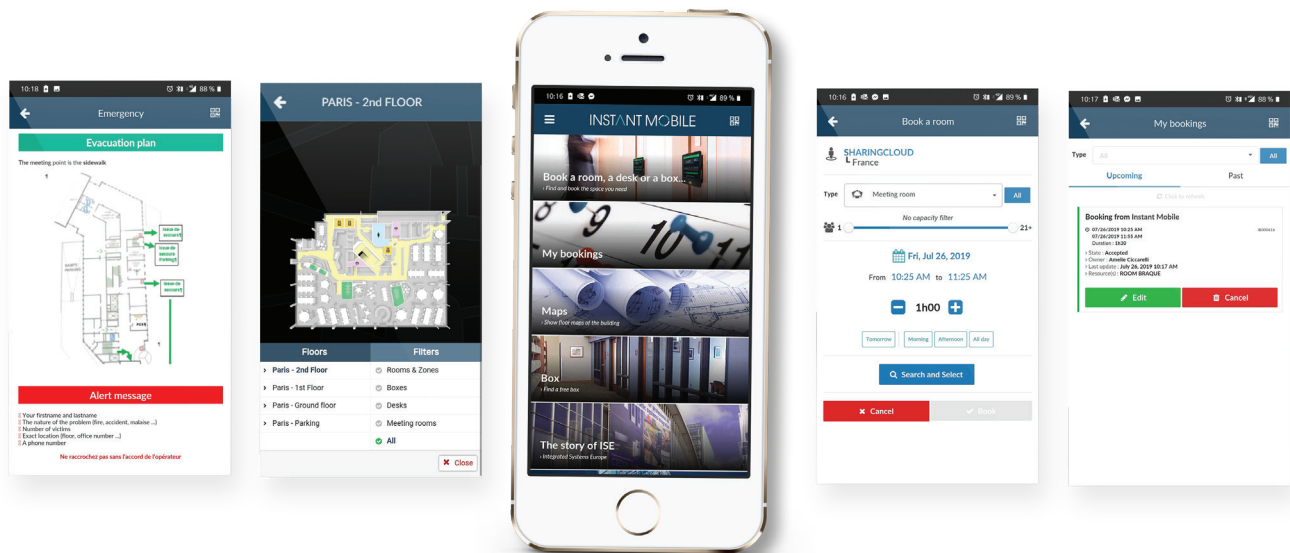

- **Find** quickly and **book a free room**.
- **Confirm your reservation** by scanning the QR Code printed on the desk or DeskTag.
- **Select the room** that best suits your needs thanks to many criteria (selection of a location, capacity of a room...).

RESERVATIONS MANAGEMENT

- Overview of upcoming user bookings.
- Detailed view of a specific reservation.

OTHER FEATURES

- **Report any problem** directly related to facility management.
- **Report** visitors.
- **Display** any information flow.
- **Customize** your interfaces to your graphic charter.
- **Geo-tracking possible** for interactive guidance.
