

ROOMPAD

INSTANT SUITE

The RoomPad® is a touchscreen panel that simplifies room booking processes

RoomPad® allows **to book, or release, a room on the fly**. It provides you with an at a glance vision of any free room. When it is inactive, the RoomPad® becomes a **digital signage device**.

RoomPad® **makes the meeting room bookable** or cancel the booking **to avoid the no show**. It reports problems, displays the availability status, and the planning of the day. Moreover, SharingCloud's RoomPad® **solves authentication problems** with its integrated badge reader.

RoomPad® is synchronised with Instant Booking, Exchange, Office 365, Google Apps and Lotus.

Visualise the interactive map of buildings

Use your badges for authentication

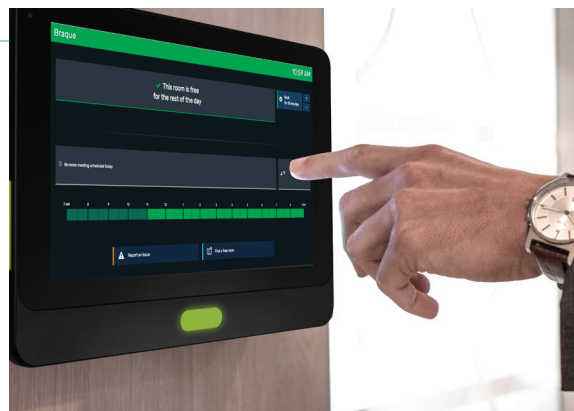

Report an issue in your meeting rooms

Avoid booking conflicts and no show

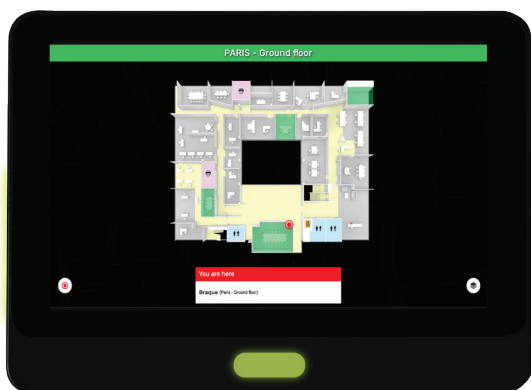

MAKE A SPACE BOOKABLE EASILY

- RoomPad® allows users **to book a room on-the-fly** (optionally with contactless reader).
- If the reservation is not validated, **the RoomPad® avoids the no show** by freeing the room.
- It also **displays all the daily bookings** and their duration.

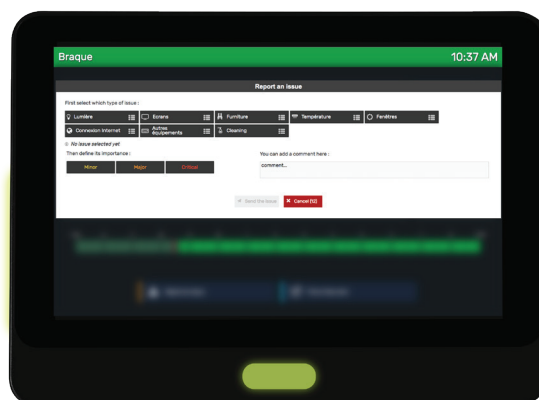

INFORM EMPLOYEES AND VISITORS

- You can access an **interactive map** of the building on each RoomPad® **to find your way around and visualise available spaces**.
- In standby mode, RoomPad® can play the corporate content of your choices.
- The **LED** on each RoomPad® allows you **to spot every room available** in a corridor.

SOLVE QUICKLY AN ISSUE

- You can **report an issue** in a room (such as coffee stain) on each RoomPad®.
- A **notification will be sent to the right maintenance building team** to solve the identified issue.

TECHNICAL SPECIFICATIONS

10.1" IPS touch screen (178° viewing angles)

Supported formats: HTML5/ Full HD Video (Jpeg, H264, Mpeg)
