

# INSTANT TV

INSTANT SUITE

The complete video media management platform within your information system

Instant TV offers all the features allowing Communication departments **to efficiently manage the entire life cycle of video content** (publication, MP4 encoding, optimised broadcasting streaming, channels and contribution rights management, etc).

The platform manages the **broadcasting of videos anywhere in live and VOD** on your Intranet and any digital signage screen (including RoomPad®, GroomPad, GuestPad and SignPad).

Live events or VOD  
broadcasting

Optimised end-user  
experience on all  
devices

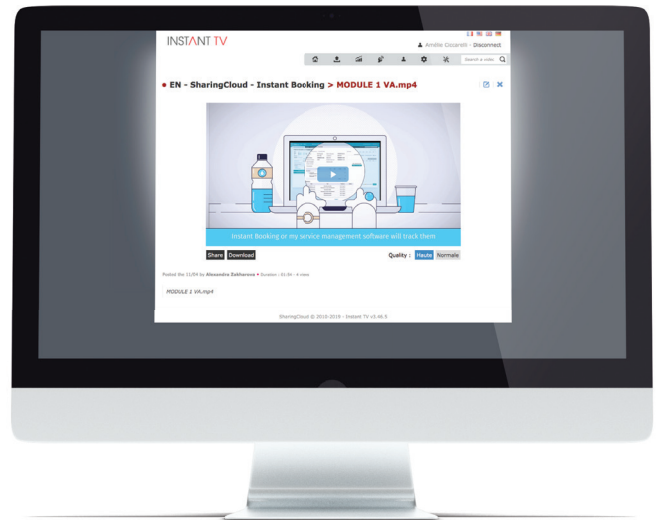

Intranet/CMS  
easy integration

Social features

Instant TV allows your employees and administrators to:

- **Publish** a video live, pseudo live, or video-on-demand (VOD). This publication is either open to all or managed with access rights by contributor.
- **Manage** the broadcasting of live or streamed video events.
- **Automatically transcode** all video formats to MP4 in full HD and 4K.
- **Integrate** simply and efficiently into your Intranet and Content Management System (CMS) such as Wordpress, Sharepoint, JaliOS, Joomla.
- **Broadcast** these videos on any types of PC, Mac, smartphones and tablets.

Instant TV's intuitive interface allows you **to manage and view different video channels** in your organisation. All social features such as rating, sharing, or adding comments are made simple and easy with Instant TV.
